

ST-HDV - HIGH-END ACRYLIC GLASS FRONT PROJECTION SCREEN

ST-HDV Screen is the very first front projection screen made from 100 % acrylic glass and

developed by Screen-Tech. The color is titanium dioxide white, the whitest white in the world. This enables an absolutely neutral color reference

class projection image. ST-HDV Screen offers incomparably HDTV quality, especially through the micro fine-matte surface and the titanium white.

Both sides useable at the same time with two projectors.

ST-HDV for best results
